## **Introduction: sustainable finance and financial education**

Eugenia Macchiavello and Michele Siri

Sustainable finance in context	12
The importance of financial education	12
The EUSFiL Centre and its activities	13
A presentation of the objective and structure of the e-book	14

### **Part One**

#### **FIRST OVERVIEW**

##### **Chapter 1**

### **WHAT IS SUSTAINABLE FINANCE AND HOW CAN IT CONTRIBUTE TO SUSTAINABLE DEVELOPMENT?**

Eugenia Macchiavello

1. “Sustainable finance”, “responsible investing”, “ESG investing”, etc.: all the same?	17
2. Finance, not just investments!	20
3. A first (un-official) definition of sustainable finance and a first overview of the (legal) concept of sustainable investments	22
4. The role of sustainable finance	26
5. Sustainable finance: efforts in setting standards at EU and international level	30
References	34

##### **Chapter 2**

### **SUSTAINABLE FINANCIAL PRODUCTS AND STRATEGIES**

Stefano Piserà and Laura Nieri

1. Introduction	36
2. Sustainable financial products: the state of the art	38
2.1. Sustainable debt instruments	38
2.2. Standardization and Guidelines	40

2.3. Sustainable funds and Sustainable Exchange Traded Funds (ETFs)	40
2.4. Financial characteristics of sustainable bonds and sustainable funds	41
2.5. Sustainable financial investments strategies	42
3. Conclusions	43
References	43

### **Chapter 3**

## **A FOCUS ON IMPACT BONDS**

Rosalia Santulli and Laura Nieri

1. Introduction	45
2. Social Bonds: Definition, Principles, and Market Characteristics	46
3. Social Impact Bonds: Definition, Structure, Phases and Models	50
4. Development Impact Bond: An Adaptation of SIBs in Developing Countries	53
5. Conclusions	55
References	55

### **Chapter 4**

## **SUSTAINABILITY AND INVESTOR BEHAVIOUR**

Barbara Alemanni

1. Why people show interest in sustainable investments?	58
2. Are people really interested in sustainable investments?	59
3. Do investors invest in sustainable assets?	62
4. The intention-action gap in sustainable investments	64
5. Concluding remarks	66
References	66

### **Chapter 5**

## **REMAINING MAIN CHALLENGES IN THE AREA OF SUSTAINABLE FINANCE**

Eugenia Macchiavello

1. Introduction: the potential obstacles to the functioning of the market of sustainable finance	68
2. Complexity of sustainable finance and investor's understanding	69
3. Lack of clear definitions, minimum parameters of ESG investments and information verification: in particular, the risk of greenwashing	69
4. In particular, ESG rating and scoring	70
5. The offer side: financial intermediaries' lack of ESG risk integration and offering of ESG products	71
6. Regulatory response: revisions to the legal framework and financial education	71
References	73

## Chapter 6

# THE EU APPROACH TO SUSTAINABLE FINANCE

Luisa Nenci

1. Action Plan on Financing Sustainable Growth	77
1.1. Introduction: Background and Overview of the Action plan	77
1.2. Objectives and Actions	78
1.2.1. Objective (i) reorienting capital flows towards sustainable investment, to achieve sustainable and inclusive growth	79
1.2.2. Objective (ii) managing financial risks stemming from climate change, environmental degradation, and social issues	80
1.2.3. Objective (iii) fostering transparency and long-termism in financial and economic activity	81
2. The Green Deal	82
2.1. Overview of the Green Deal	82
2.2. The Green Deal implementation	83
3. The Strategy for Financing the Transition to a Sustainable Economy	84
3.1. The “Renewed EU sustainable finance strategy”	84
3.2. The four strategic objectives of the Strategy	85
4. A sustainable finance framework that works on the ground	86
4.1. The Taxonomy Delegate Acts on Environment	86
4.2. ESG ratings and credit ratings	86
4.3. Transition Finance	87
4.4. Forthcoming European sustainability reporting standards	87
References	87

## Part Two

# A CLOSER FOCUS ON THE EU LEGAL FRAMEWORK FOR INVESTOR PROTECTION

## Chapter 7

# THE EU GREEN TAXONOMY

Ilaria Ceriana

1. Introduction	90
2. The first of the three ESG pillars: the environment	90
3. Implementation of technical standards and delegated acts	92
4. Conclusions	92
References	93

## Chapter 8

# SUSTAINABILITY REPORTING: THE SUSTAINABLE FINANCE DISCLOSURE REGULATION (SFDR)

Anna Molinari

1. Genesis and core objective of the SFDR	94
2. Transparency at entity level: sustainability risk and PAI	96
3. Transparency at product level: ESG funds and the SFDR	97
3.1. Overview of sustainable financial products	97
3.2. Products promoting environmental or social characteristics	98
3.3. Products having sustainable investments as their objectives	99
3.4. What should be disclosed in relation to an Article 8, 8+ or 9 product?	100
4. Coordination between the SFDR and the Taxonomy Regulation	101
References	103

## Chapter 9

# THE IMPORTANCE OF INFORMATION FROM COMPANIES: CORPORATE SUSTAINABILITY REPORTING DIRECTIVE (CSRD) AND CORPORATE SUSTAINABILITY DUE DILIGENCE DIRECTIVE (CSDDD)

Francesca Palazzini

1. Importance of information from companies: the relevance of retail investors for the Action plan of 2018	105
2. From the NFRD to the CSRD	106
3. Core objectives of CSRD	107
3.1. The new sustainability reporting: what does it change?	107
3.2. The double materiality	108
3.3. The value chain	109
3.4. Scope of application	110
3.5. A quick look at the ESRS	111
3.6. The digitalization of information: ESEF and ESAP	112
3.7. Limited assurance and reasonable assurance	112
4. Future legislative trends: from information disclosure to corporate due diligence	113
References	114

## **Chapter 10**

# **THE NEW ROLE OF SUSTAINABILITY PREFERENCES IN THE REGULATION OF INVESTMENT SERVICES**

Matteo Gargantini

1. A new role for sustainability preferences	116
2. The scope of application of the new regime on sustainability preferences: investment advice and portfolio management	117
3. The context of the new regime for sustainability preferences: conduct of business rules	118
4. Introducing sustainability preferences in the big picture	122
5. How does your intermediary follow up on your sustainability preferences?	125
References	127

## **Chapter 11**

# **THE EU GREEN BOND STANDARD**

Chiara Valenti

1. The green bond market: barriers and existing standards	129
2. Proposal for a Regulation on European Green Bonds	132
3. The Regulation on European Green Bonds	133
3.1. A focus on the main characteristics of the Green Bond Standard	135
3.2. Critical analysis of the Regulation	136
References	137

# **Introduction: sustainable finance and financial education**

Eugenia Macchiavello and Michele Siri

There is an evident urgent need for a transition to a circular and sustainable economic system. States, financial institutions, NGOs, companies, professionals and the civil society are together required to quickly find solutions to cope with the challenges posed by climate change and the current and future detrimental effects of human business activities on the environment. This e-book, conceived as an instrument of financial education about sustainable finance, wants to contribute to such transition.

## **Sustainable finance in context**

The EU and European Commission, since the launch of the first [EU Sustainable Development Strategy in 2001](#), has committed to contributing to the promotion of sustainable development in key cross-sectoral projects, by intervening in all environmental, social and governance (ESG) areas. Sustainable finance has been recognized as a fundamental contributor to sustainable development and to reaching the 2015 [UN Sustainable Development Goals](#). Based on the Final Report of the [High-Level Expert Group on Sustainable Finance \(HLEG\)](#), the EU Commission adopted in March 2018 the [Action Plan “Financing Sustainable Growth”](#), which established a plan setting out strategic recommendations for a financial system that supports sustainable investments. Since then, the EU has been developing over time a comprehensive regulatory framework in the area of sustainable finance, with the objective of supporting the growth and correct functioning of such market, also as a part of the broader 2019 [EU Green Deal](#). This represents an ambitious and broad package of measures that should enable European citizens and businesses to benefit from sustainable green transition.

## **The importance of financial education**

Given the complexity of the financial system and of its policy and regulatory framework and of sustainable finance itself, there is a strong need of research work and initiatives in the area of sustainable finance. Financial education has become a priority in international and national public policies for raising citizens awareness and understanding of the financial sector and therefore contributing to their financial inclusion and welfare, as well as at the same time, the correct functioning of the market (see the various workstreams and task-forces set by OECD, IOSCO, World Bank, G-20, Financial Stability Board, etc.).

This e-book aims at contributing to spreading the knowledge of sustainable finance and its regulation.

## The EUSFiL Centre and its activities

The e-book has been developed by the Jean Monnet Centre on European Union Sustainable Finance and Law ([EUSFiL](#)) of the [Department of Law](#) (company law and economic law section) of the [University of Genoa](#), created in 2020 by its Director Professor Michele Siri with the support of the EU Erasmus+ programme (Ref. Project: 620519-EPP-1-2020-1-IT-EPPJMO-CoE).

The Centre's activities' focus is on sustainable finance, with particular regard to the recent reform of the EU financial system. The Centre's mandate is to engage in research, education, and publications that broadens inquiry, dialogue, and debate beyond traditional academic boundaries, bridging the gap between theory and practice. EUSFiL aims to contribute to the achievement of UN Sustainable Development Goals, with particular reference to SDG 8.10 (strengthening the capacity of domestic financial institutions to encourage and expand access to banking, insurance and financial services for all).

Figure 1. EUSFiL Centre's activities

Source: by Eugenia Macchiavello and Michele Siri.

With particular regard to the research activity, EUSFiL focuses on the legal implications of the integration of sustainability in the financial sector. In this respect, the Centre brings together a team of experienced scholars from different countries and backgrounds, with a very high and diversified profile in various fields (corporate social responsibility, corporate governance, capital markets, banking and insurance law, financial regulation, law and economics, economics and finance, etc.). Several activities have been performed in collaboration with other well-known international research centres, allowing a continuous exchange and ideas, recommendations and scientific knowledge. The four main workstreams are presented in figure 2.

**Figure 2. EUSFiL Centre’s workstreams**

Source: by Eugenia Macchiavello and Michele Siri.

EUSFiL’s teaching and educational activities are also numerous and diversified: team members have organised several financial education seminars about sustainable finance in the context of the annual [IOSCO Investor Weeks](#) and the Italian “[financial education month](#)” as well as visited secondary schools to present sustainable finance and its EU regulation to their students. EUSFiL members offer sustainable finance courses or modules at their Universities and are invited to give lectures on the same topic at other Academic institutions. Within these teaching activities, EUSFiL has also developed, together with the University of Genoa e-learning team and [EduOpen](#), [three Massive Open Online Course \(MOOCs\)](#) dedicated to different aspects of sustainable finance and at different levels.

Other activities have been developed with other centres and Departments of the University of Genoa, which presents a rich portfolio of courses in the area of sustainability in different sectors as well as interdisciplinary courses on sustainability (see <https://unigesostenibile.Unige.It/Educazione>).

## **A presentation of the objective and structure of the e-book**

Within this background, the present e-book aims at increasing the level of financial literacy in the EU in the specific area of sustainable finance in line with the objectives of the EU green deal and action plan on financing sustainable growth. This is the first or one of the first financial education publications to address the recent EU legal framework for sustainable finance.

The e-book presents and explains, in easily understandable terms, fundamental notions in the area of ESG financial markets and financial regulations. The first Chapters will explore the main characteristics of sustainable finance, its role in contributing to sustainable development and the main sustainable investment products. In a second part, after providing an overview of the EU legal reform in the area of sustainable finance, the e-book will focus in explaining the most important legislative acts and initiatives. This will contribute to increasing investors’ trust in sustainable investment products and make them aware of the effects of their investment choices on sustainability issues. As most investors are not even aware of the existence of sustainable financial products, this initiative will likely facilitate the channelling of private capital to sustainable activities and therefore to the objectives of sustainable transition.

To reach more effectively its objectives of financial education and dissemination, the e-book will adopt a clear and simple language despite its technical topic, recur to infographics to help the reader more easily understand complex concepts, reduce at a minimum footnotes, while using hyperlinks to refer to additional sources in a convenient way for readers and boxes to better explain concepts. Nonetheless, the e-book is addressed also to academics and professionals, aiming at promoting dialogue and discussions: hyperlinks and references to academic literature and official EU documents in footnotes at the end of each Chapter provide readers with the opportunity to deepen their knowledge about the most relevant topics and engage in current academic and legislative discussions.
